

# Fleet Safety Management

## INTRODUCTION

This training program is designed to provide the essential general knowledge and understanding of Fleet Safety Management for employees in manufacturing, commerce, public or service industries.

Workers who use motor vehicles in performing their jobs are spread across numerous other occupations. These include workers who operate vehicles owned or leased by their employer, and those who drive personal vehicles for work purposes. Does your organization need a Fleet Safety Plan? This course will help you in ensuring the fleet safety systems and controls in the place and that they are operating effectively.

This is suitable and recommended for any health and safety officers and staff members or employees from different sectors and level who are getting into the occupational safety and health field and wants to have knowledge on OSHA's objectives
