

Occupational Safety and Health Supervisor Program

INTRODUCTION

Occupational Safety and Health Supervisor Program provides fully equipped topics that focus not only in the field of safety but on how to become an effective supervisor and leader.

Supervisors are the key to a world-class safety culture. As an "agent of the employer," every supervisor has a legal obligation to understand his or her safety responsibilities in the workplace. This program helps ensure supervisors have the knowledge and skills to fulfill those responsibilities.

Learning Objectives and Outcome

This programme's ultimate goal is to help people be an effective supervisor and understand different leadership styles to apply and be a safety supervisor. The program is designed to help candidates:

Be aware of what it takes to be a supervisor and an effective leader
Understand the safety management structure and design
Understand the nature of an OSH training
Know the importance of accountability and safety education
Select appropriate PPE for a variety of circumstances
Be effective in investigating and analyzing accidents and different scenarios
Keep track of the safety management system.
